

**INSTRUCTION MANUAL
FOR TELEPORT AND
OBJECT GRASP**

TELEPORT INSTRUCTIONS

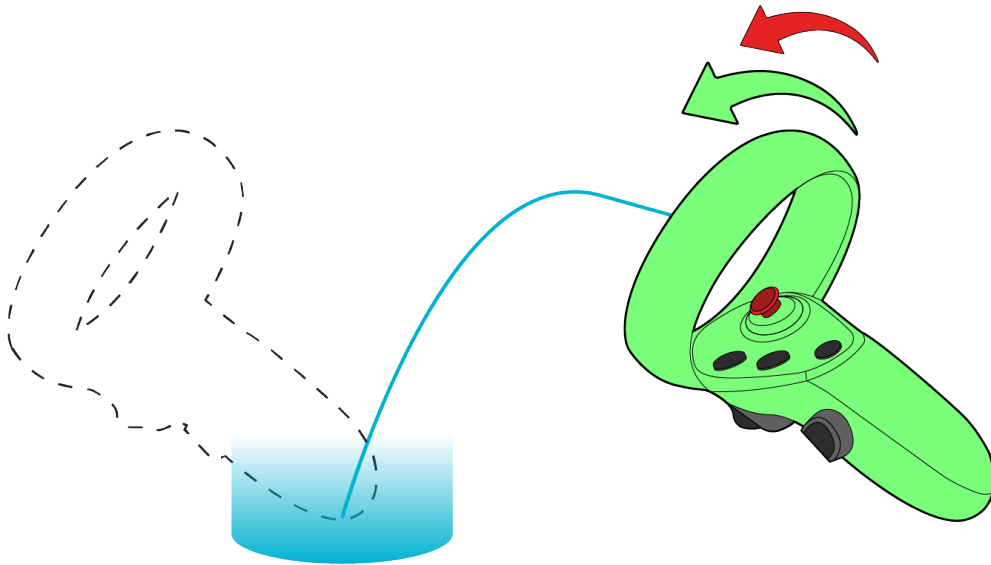

1. After grasping and securing both controllers, place your right thumb on the analog stick

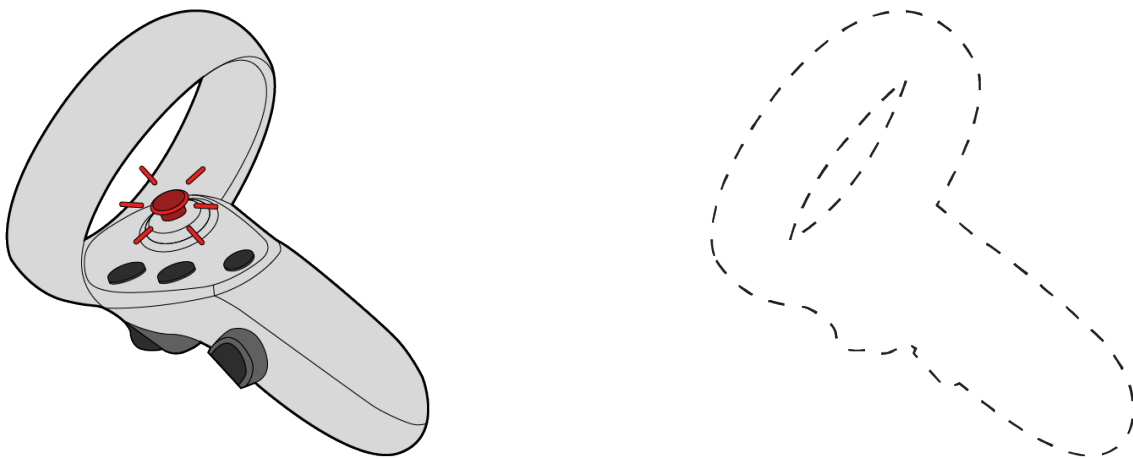

2. Move the right controller stick forward; you will see the projection of the selected position visible with an arc and a blue circle on the ground

3. Choose the teleportation position by moving and tilting the controller

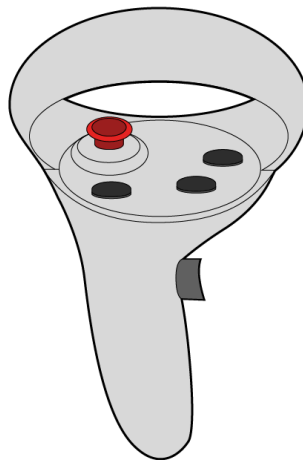

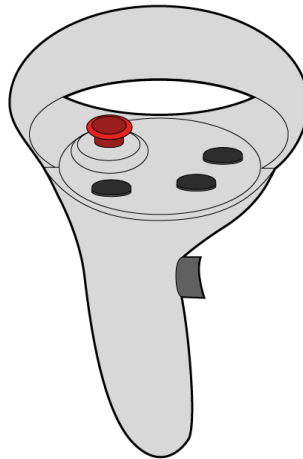

4. When the teleport position is decided, release the stick and you will move to the area where the blue projection was

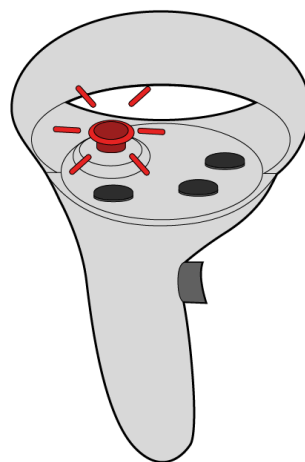

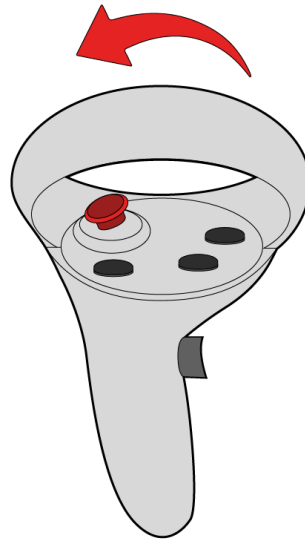

5.

To rotate the orientation of the direction, place your left thumb on the stick of the left controller and move your finger

6.

When the direction is chosen, release the stick

MANUAL OF OBJECT GRASP

1. Identifies the object to be grasped

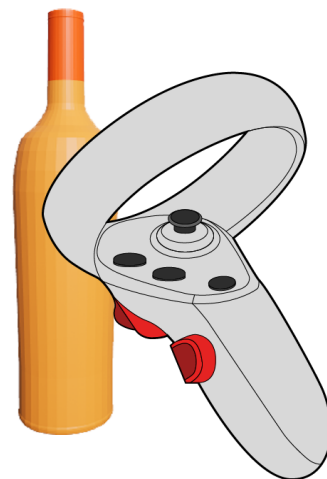

2. Approach the object to be taken, using a controller

3. Hold the index and middle fingers near the object

4. Keep the index and middle fingers pressed near the object

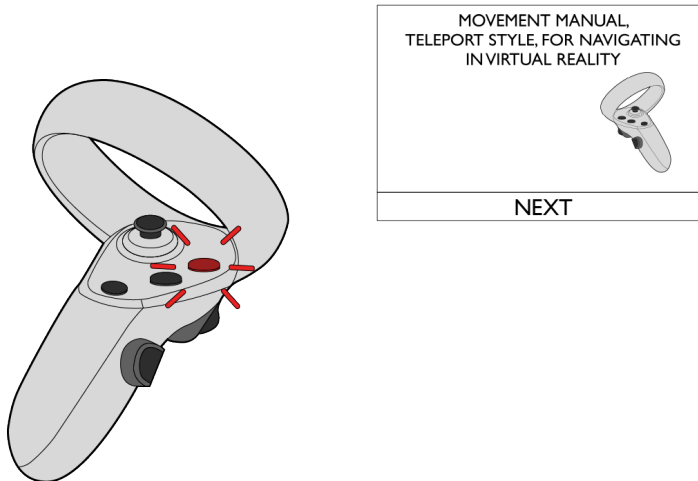

5. To release it, remove your fingers from the controller buttons

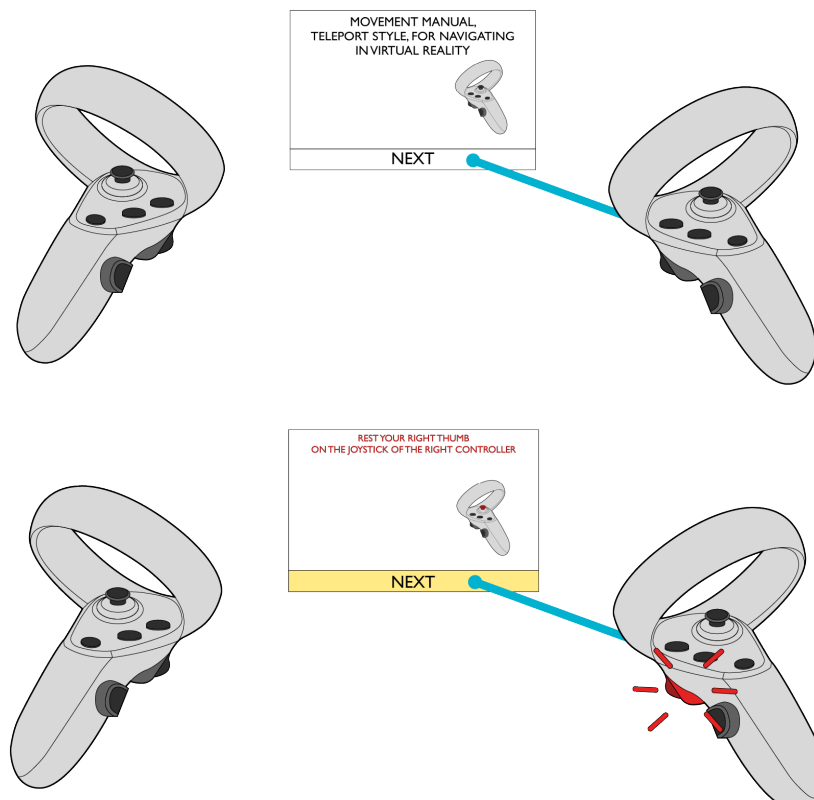

OPEN THE IN-GAME TUTORIAL

1. You can review the in-game tutorial by pressing Y on the left controller

2. With the pointer of the right controller, pointing at the text 'NEXT' and pressing the button below the index finger, you can scroll through the tutorial

3. To remove the tutorial, simply press Y again on the left controller
